DETAILED ACTION

Allowable Subject Matter

Claims 1-3 are allowed.

The following is an examiner's statement of reasons for allowance: Claim 1 contains allowable subject matter for at least the reason that the prior art of record fails to teach or reasonably suggest a method for automatically controlling X-ray dosage for producing an image by computed tomography comprising the steps of using an X-ray tube to obtain a plurality of reference measurements by irradiating a plurality of phantoms to produce computed tomography images, setting a tube current that produces a level of noise representative of an acceptable image quality and subsequently obtaining attenuation data from an examination subject for producing a computed tomography image with attenuation comparable to the attenuation of at least one of the phantoms as claimed. While obtaining attenuation data of phantoms is known in the art, obtaining attenuation data of phantoms by computed tomography and also obtaining computed tomography images is not suggested, as claimed. As shown by Tachizaki, phantoms are usually studied by way of scanograms. The subsequent control of examination subject exposure with noise and quality information obtained from the computed tomography phantom scanning is therefor not taught.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Krystyna Suchecki whose telephone number is (571) 272-2495. The examiner can normally be reached on M-F, 9-5.
